À Propos

I am an architect and an experienced back-end developer in C, Python and go.
I am specialized in the domains of identity, authentication and securing access to services and data.
I am also very interested in software development methods.
I adhere to the values of software craftmanship and "extreme programming".
I approach architecture through Domain Driven Design and software patterns that allow for continuously evolving architectures.

Skills

Go, Python, C

Architecture

Security

Methods

Experience

Architect – leboncoin, *2022 – now*
DDD, Continuous Delivery, evolving architecture, coaching.

Back-end developer go – leboncoin, *2016 – 2022*
Authentication, authorization, identity, scalability, methods.

C Developer – Exosec, *2015 – 2016*
Observability application development

C Developer – Intersec, *2013 – 2015*
High-performing application development

Developer for image processing – Intitek, *2012 – 2013*
Embedded algorithms

Image processing engineer – DxO Labs, *2011 – 2012*
Design of algorithms with Python

Post-doctorat – CEA, *2009 – 2011*

PhD – CNES, *2006 - 2008*

Education

Institut d'Optique Graduate School, *2002 – 2005*

Louis-le-Grand, *2000 – 2002*

ENCPB, *1999 – 2000*

Lycée Claude Monet, *1992 - 1999*
